

# FlexAbility™ Time & Attendance Hardware Devices

## FlexAbility™ CE TimeClock

The FlexAbility CE TimeClock from Coalition Computing is designed to accurately manage employee time and attendance, in addition to reporting time to each Step of a Production Order or each Task of a Project in Microsoft® Business Solutions - Solomon® and JAAS® Advanced Manufacturing Software (JAMS).

Featuring in a single unit an Intel StrongARM RISC processor with a full-color touch-screen display, the FlexAbility CE TimeClock offers all of the functions needed to support FlexAbility Time and Attendance.

Available as either a wall or desk-mounted option, the FlexAbility CE TimeClock supports either bar-coded or magnetic-stripe badges for consistent and reliable data input of employee identification and employee ID numbers. The terminal can also be equipped with optional bar-code wands and scanners for reading bar-coded documents such as Production Orders or Operation Steps, in addition to Project and Tasks. Connectivity options include wired or RF wireless.
